To Whom It May Concern

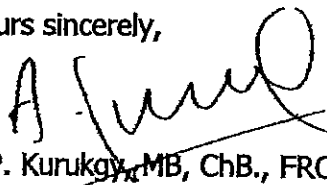

My name is Dr. A. Kurukgy. I am an orthopedic surgeon who is based in London, England. I am on staff at several hospitals with my primary base being Stamford hospital.

I came to Canada two years ago at the urging of my relatives who had benefited from Bio-Flex Low Intensity Laser Therapy. At the time I was taking numerous medications for pain and utilizing anti-inflammatories for two severe shoulder problems as well as a herniated cervical disc. After one-hour daily treatments for one week at the Meditech International Clinic I was relatively pain-free and off medications, and the quality of my life had been returned.

Since then I have made two additional trips to Canada to study the Bio-Flex System and its application at the Laser Rehabilitation Centre. Indeed, I purchased and set up two units myself in London, England at Stamford Hospital.

During my three week-long visits to Canada I have spent considerable time observing Dr. Kahn treating patients, i.e. doing initial assessments, re-evaluations and directing therapy. At all time I have found him to be a thorough and intuitive physician who demonstrated a great deal of compassion and consideration for his patients. He is certainly the ultimate professional and I am looking forward to the publication of his text, which has recently been initiated.

Yours sincerely,

A.P. Kurukgy, MB, ChB., FRCS
