RE; Dr. Kahn (Meditech Inter. Inc.)

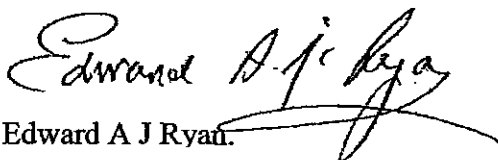

To Whom It May Concern:

I was first referred to Dr. Kahn in the summer of 2001 complaining of rotator cuff pains from playing golf. I had been referred to him by my family doctor, Dr John Kuhlmann, after Dr Kahn's name had been offered to me by one of the top female golfers in North America. After appropriate history and assessment by Dr Kahn, I was started on his cold laser treatment and after less than 2 weeks I was discharged from his care as I was now pain free and able to play golf again. To say I was impressed would be a gross understatement.

I have since then referred many of my friends with various sports injuries including some who were no better post operative, with dramatic results in the vast majority of these people, both male and female.

On the 12th Dec 2001 on my way home from my office at 5:30 pm and as I drove off the Q.E.W. onto Cawthra through a green light I was hit by a truck, on my driver side, without any warning. Actually the first time I realized there was a problem was when my head banged against the window on my side. I did not feel too bad and went to Florida on vacation on the 16th but had to come back a week early as my neck "froze up" and I was not able to do any type of exercise. I immediately had my family, Dr John Kuhlmann, refer me to Dr. Kahn and I started on 3 time per week neck treatments. Thanks to this treatment I was able to carry on with my busy practice (Infertility and assisted reproductive technology) starting at 7 am each day until 3 pm and on Saturday and Sundays also. The care and medical attention and close follow up that I received was excellent and on Dr Khan's recommendation when in July I had a relapse of symptoms he arranged for an MRI scan that I had since had. I have been continually assessed and reassessed by Dr Kahn over the past 8 months and I have the highest regard for his professional care and dedication in helping me and many other of my friends and hospital co-workers to achieve a rapid return to normal activity and life.

Sincerely Yours,

Edward A J Ryan.
