

December 2004

From time to time we all count our blessings. Mine are truly exceptional having had the good fortune to meet Dr. Kahn and his associates.

Thinking back to a year ago, I was totally unable to have a normal lifestyle. I was using two canes and needed help to take a few steps as I was in such excruciating pain with a major back problem.

Rather than have surgery I opted to go the other route with Dr. Kahn.

My treatment began in early December. By the beginning of February I was able to go off my medication for pain control.

Treatment by treatment the discomfort lessened until I was totally pain free.

I have returned to my previous active life, playing good golf this past summer, am able to entertain and enjoy the life that I was given back to me through the extraordinary laser treatments I received at Meditech. I will be forever grateful to Dr. Kahn and his capable, friendly staff. I fondly refer to Dr. Kahn as the Wizard of Oz.

As a footnote I would like to mention that I am 83 years of age, but feel twenty years younger with this renewal.

My heartfelt gratitude to all of you at Meditech,

*Elda Walton*
