M8W 4W3.

Dear Fred:

Back in February of this year I experienced extreme pain in my right knee, to the point of being up every night at 2-3 in the morning unable to stand the pain. After visiting an Orthopaedic Surgeon, my assessment was arthritis and was told to live with the pain.

Mr family Doctor prescribed five different pain killers, which did nothing to relieve the excruciating pain.

On my last visit to my family Doctor he suggested I contact you and your firm to discuss laser therapy. You and your excellent staff did a wonderful job with my assessment and treatment. After the third treatment I could not believe the drastic improvement in my knee.

My treatments have been finished for more than ten weeks and I can now golf three times a week and bicycle twice a week with absolutely no pain.

This is not an overstatement, but I can categorically say this is a miracle.

Thank you.

KENNETH J. BENZIES.
